- All audio files link to the network can be read.
- Displays of all information's (covers, files names, time...)
- "gapless" system (uninterrupted playback of consecutive audio tracks)
- Readable formats: FLAC/WAV 176.7kHz & 192kHz/24bits, ALAC, AIFF, MP3...
- Possible update via internet (*available soon*).

DAC & Pre-amp / connectings:

- 2 USB «A » Inputs (1 front & 1 rear).
- 3 digital Inputs :
 - 1 USB « B » (24 bits/96KHz)
 - 1 Coaxial SPDIF (24 bits/192KHz)
 - 1 Optical SPDIF (24 bits/192KHz)(Burr-Brown PCM1792 Converter for the ST200 and PCM1796 for the ST100)
- 2 analog Inputs
- 1 RJ45 network link
- 1 Wifi antenna

- 1 pair of analog RCA Output
- 1 digital Output (coaxial)
- 1 digital Output (Optical)
- 1 headphones Output (on front panel)

End users:

- 3,5" QVGA TFT color display
- All functions available from the front panel and the remote control
- Serial remote control (volume control, Inputs selection, web radio setup...)
- Control with a free downloaded Apple® or Android® app. (*available soon*).

Audio specs:

- Symmetrical outputs stages with discrete components polarized in A class
- Analog volume control (with commutated resistors) with possible By-Pass
- Transformer specifically dedicated to audio stages (3,6VA for ST100 – 5VA for ST200)
- MKT capacitors for audio links (2,2µF for ST100 – 10µF for ST200)

1,5mm steel chassis
Aluminum front panel (black or silver) of 4mm (ST100) and 8mm (ST200).
Dimensions: 440*290*90 mm
Weight: 5 Kg (ST100) – 5,5Kg (ST200)
